

Fire Pass Product Listing Scheme

CSIRO Infrastructure Technologies has introduced a Fire Pass Product Listing Scheme. The scheme comprises a CSIRO website which will host Certificates of Test, Certificates of Assessment and Assessment Reports for products, components or systems tested at the CSIRO Fire Science laboratories.

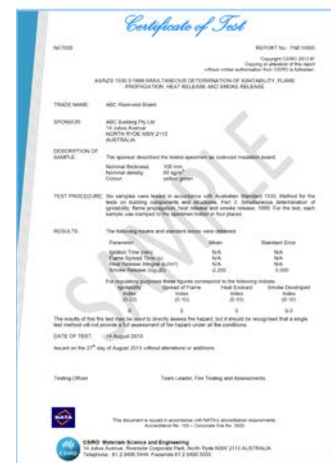

Member's Certificates of Test, Certificates of Assessment and Assessment Reports can be listed on the *Fire Pass Product Listing Scheme* website for a fee and be available for download by members of the public including certifiers, architects, building professionals and building owners.

Objectives

- To make available to certifiers, architects, building professionals and building owners the means of checking the authenticity of test results of CSIRO issued Certificates.
- To verify the conformity of tested products, components or building material systems to either Australian or International Standards.
- To verify the conformity of any variations to a tested prototype. This is limited to Certificates of Assessment relating to fire door hardware.
- To provide industry with a list of emerging and new technologies in the field of passive fire protection.

Advantages

- To facilitate faster acceptance in the marketplace.
- To provide confidence to certifiers, architects, building professionals and building owners that the product listed in the Scheme has been tested by a **Registered Testing Authority under the provisions of the Building Code of Australia (BCA)**. This means CSIRO Fire Test and Fire Assessment Reports are evidence of suitability under the BCA.

CSIRO Certificate of Test / Certificate of Assessment
